SUMMARY

I'm Awotayo Samuel, a Nigerian based frontend web developer, I am passionate about building accessible and user-friendly web interfaces using HTML, CSS and JavaScript with other frameworks. I have a bachelor of engineering degree in metallurgical and materials engineering, and a responsive web design certification. I have contributed to multiple projects for clients in various industries. I enjoy working with a diverse and collaborative team, and I am always eager to learn new technologies and best practices. My goal is to deliver high-quality and accessible web solutions that meet the needs and expectations of the users.

WORK EXPERIENCE

- Developed responsive website templates using HTML, CSS, and JavaScript to solve frontend challenges from [frontendmentor.io](#), resulting increase in user engagement.
- Implemented innovative design solutions for complex UI/UX problems, resulting decrease in user error rates and improving overall user satisfaction.
- Developed innovative solutions to frontend challenges from [frontendmentor.io](#), [figma community](#) and [other tech communities](#) which resulting in a 90% completion rate and positive user feedback.
